

Please, please stay out of the way of progression. Competition is what makes America great and if local radio networks fear competition, then they need to provide their listeners with something that shows they are not giving up on their listeners. I'm already disgusted at the actions that have been taken place with respect to Howard Stern. This is not a dictatorship, let us listen to what we want and for those who do not want to listen to it, relief is a channel switch away. Fix something that is broken in this country, and let us have our choices. I chose to pay for satellite radio because I was displeased with AM and FM. In fact, I have no antenna aside from my XM one. America is about choices and we have chosen XM over FM, deal with it.-richard brancalone
